HOW DOES THE SPLIT MATURITY MULTI ASSET GLOBAL BOND 10 WORK?

The Split Maturity Multi Asset Global Bond 10 is only available from intermediaries who are regulated by the Central Bank of Ireland (the “Central Bank”), and who can advise you of the suitability of this product for your needs.

The Split Maturity Multi Asset Global Bond 10 offers you a 12 month deposit paying out 10% return gross (CAR2.46%) on 20% of your investment (the “Deposit Investment”).

The other 80% of your investment (the “Multi Strategy Investment”) is exposed to a multi-strategy absolute return index that aims to generate returns based on four strategies made up of Equities, Commodities, Foreign Exchange and Bonds. The Investment offers exposure to 100% of the growth, if any, of the BNP Paribas PLATINIUM Index Series 4 EUR ER (Bloomberg Code BNPIP4EE Index) at the end of 3 years 11 months.

OBJECTIVES

The Platinum Index Series 4 is designed to provide investors with an attractive risk/return ratio. It integrates four strategies: Equities; Foreign Exchange; Commodities and Bonds. These strategies are selected and combined according to the 3 following principles:

1. Four absolute return strategies:

- Each strategy is non directional
- Each strategy is well known by investment managers
- Each strategy is transparent and liquid

2. Highly diversified strategies:

- The four strategies display low correlation
- The four strategies use four different concepts

3. Strong risk control

- Each strategy embeds a risk control mechanism
- An overall volatility control is added

The low correlation amongst the 4 strategies* results in:

- A strong risk/return ratio: Average Sharpe ratio of the individual strategies is close to 1.5

The four strategies strongly complement each other*:

- Individual strategies can perform poorly in some market conditions
- The Platinum 4 Index could still generate performance even if one strategy does not

*based on performance testing

Warning: Past performance is not a reliable guide to future performance. Future investment returns are dependent on future market conditions.

The four strategies that make up the Platinum 4 Index:

The Equity and Foreign Exchange strategies have a 15% weighting each and the Commodities and Bonds strategies have a 35% weighting each. These weightings have been set according to their downside risk (based on historical maximum drawdowns) and volatility risk. The Platinum 4 Index adjusts exposure to the basket of strategies on a daily basis, in order to maintain volatility close to 3%.

Overview of the four individual strategies within Platinum 4:

Equity strategy:

Long/short positions on European stocks

Stock-picking is one of the most common techniques used by traditional asset managers to outperform their benchmarks: they aim to select attractive stocks within their investment universe and avoid weak ones

The same approach can be used for absolute return investment by seizing the spread between the stocks identified as attractive and the ones identified as weak

For instance, if a company records a -20% return while another one records -25%, we can try and capture the 5% spread

Foreign Exchange strategy:

Capture the yield spread between currencies

Interest rates among countries differ and imply different monetary asset returns depending on the currency denomination

For instance, if the US interest rate is 1% and Australian interest rate is 5%, it is possible to borrow in USD at 1% and lend the respective amount in AUD at 5%. The 4% spread is then captured (assuming FX rates are unchanged)

Commodities strategy: Arbitrage opportunities based on the roll optimisation of commodities

Commodities are invested via the futures market and not the spotmarket. Consequently, to avoid physical delivery of the commodity, futures positions are regularly rolled.

However, the process of rolling futures (selling expiring futures to buy longer dated ones) generates a negative return in a contango situation. This negative return can be reduced by rolling further along the futures curve, which tends to flatten out.

A market neutral position can aim to generate a return by combining a long position on longer dated futures (which suffer a smaller negative roll return in contango) with a short position on shorter dated futures (that suffer from larger negative roll return in contango markets).

Bond strategy:

Momentum and carry opportunities based strategy

Medium and Long Term Government Bonds are more likely to have persistent trends than short term debt instruments. Trends are less disrupted by short term mean reversion, hence allowing them to follow shorter term trends.

Through investments in bond futures, the strategy is exposed to movements on the slope between long-term and very short-term yields in mature government bond markets.

The implemented strategy takes into account the evolution of long-term rates and the amplitude of the spread between long-term and very-short term rates in order to determine whether to take long or short positions in bond futures.

WHO IS IT SUITABLE FOR?

The Investment is available to individuals, companies, charities, credit unions, pension investors and approved retirement funds (ARFs). The Investment is suitable for investors seeking to access 20% of their investment in 12 months time with a competitive interest rate on 20% of their investment. There is no guarantee that this Investment will provide a better return than a deposit or that The Split Maturity Multi Asset Global Bond 10 will provide any level of growth at all. If you have any doubts about this product or if you are unsure whether it meets your needs, we strongly recommend that you discuss this with your investment advisor.

KEY FEATURES OF THE SPLIT MATURITY MULTI ASSET GLOBAL BOND 10 (THE "INVESTMENT")

Warning: If you cash in all or part of your Investment before the 9th May 2016 you may lose some or all of the money you put in.

Warning: If you invest in this product you will not have any access to your money for 3 years and 11 months.

Warning: The value of your investment may go down as well as up.

HOW DOES THE INVESTMENT WORK?

The Investment is produced and distributed by Wealth Options Limited, Elm House, Millennium Park, Naas, Co. Kildare. Wealth Options Limited is regulated by the Central Bank. Ulster Bank Ireland Limited is the deposit taker. Ulster Bank Ireland Limited, a private company limited by shares, trading as Ulster Bank, Ulster Bank Group and Banc Uladh is registered in Ireland (No 25766) with its registered office at Ulster Bank Group Centre, George's Quay, Dublin 2. Ulster Bank Ireland Limited is a member of The Royal Bank of Scotland Group and is regulated by the Central Bank of Ireland.

20% of the Investment is invested in a 12 month deposit account paying a fixed interest rate of 10% gross (2.46% CAR). 100% of the Deposit Investment is protected by Ulster Bank Ireland Limited at the relevant maturity date.

80% of the Investment is invested in the Multi Strategy Investment for a period of 3 years 11 months, delivering full capital protection at the Maturity Date and with the potential for growth depending on the performance of the Underlying Index.

100% of your initial investment is protected by Ulster Bank Ireland Limited at the relevant Maturity Date. Whether there is any investment gain on the Multi Strategy Investment at the Maturity Date will depend on the performance of the Underlying Index which will be measured in accordance with the Investment Return Condition.

The Multi Strategy Investment will use monthly averaging in the final 9 months (10 observations) of the 3 year 11 month term. In the event of a significant fall in the value of the Underlying Index during the final 9 months of the 3 year 11 month term the effect of monthly averaging can protect the value of the Multi Strategy Investment by reducing the impact of such a fall on the maturity value of the Multi Strategy Investment. However, in the event of a significant rise in the value of the Underlying Index during the final 9 months of the 3 year 11 month term, the effect of monthly averaging can reduce the value of the Multi Strategy Investment by reducing the impact of such a rise on the maturity value of the Multi Strategy Investment.

Neither the Investment nor Ulster Bank receives the benefit of any investment income payable on the assets within the Index. The Investment is suitable only as a capital growth investment. The Investment is not suitable for investors who require a regular income or access to their capital before the Maturity Dates.

WHERE DOES MY INVESTMENT GO?

Your proposed investment of €20,000 in The Split Maturity Multi Asset Global Bond 10 will be used, at the date of the investment, as follows:

€4,000 or 20% will be used to secure the promised payment of €4,400 or 22% of the amount invested payable after 12 months. This is equivalent to a promised return on this part of your Investment of 2.46% CAR before tax is deducted.

€14,282 or 71.41% will be used to secure the promised payment of 80% of the amount invested payable after 3 Years 11 Months. This is equivalent to a promised return on this part of your Investment of 2.94% CAR before tax is deducted.

€904 or 4.52% will be used to secure the cash bonus which may be payable after 3 years 11 months.

€814 or 4.07% will be taken in charges. Ulster Bank will pay Wealth Options a fee equivalent to 4.07% of the initial investment amount for arranging this product. From this fee Wealth Options will pay your intermediary a fee of 2.5%. (€500)

€20,000 100% Total

If the cash bonus is zero, the promised payment will represent a return of 0% per annum on your total investment over the period to the date of the promised payment before any tax is deducted.

In order to generate the Variable Return (if any), Ulster Bank will enter into a derivative contract with BNP Paribas. If BNP Paribas fails to pay Ulster Bank any proceeds from this contract then investors may receive back only their Capital Protected Amount at the Maturity Dates.

FEES AND CHARGES

Wealth Options Limited will receive a commission in relation to its arrangement of the Investment of 4.07% for its role as Arranger. From this commission an intermediary appointed by Wealth Options Limited will receive a distribution commission of 2.50% in relation to their distribution of the Bond.

Warning: Deductions for charges and expenses are not made uniformly throughout the life of the product but are loaded disproportionately onto the early period. If an investor withdraws from The Split Maturity Multi Asset Global Bond 10 prior to the end of the 3 year 11 month term, the front end loading feature will impact on the amount of money that the investor receives

DO I HAVE ACCESS TO MY INVESTMENT?

The Investment is for the Term and no withdrawals may be made without Ulster Bank's consent prior to the Maturity Dates. Such consent would be given entirely at Ulster Bank's discretion. The Variable Return (if any) on the Investment will depend on the performance of the Underlying Index.

If you do require access to your Investment before the Maturity Date, you would only receive the then present value of the Investment at that time, which may be significantly less than the amount you invested.

WHAT HAPPENS IF I DIE BEFORE THE INVESTMENT MATURES?

For investors who are individuals, in the event of the death of a sole investor or of a surviving joint investor before the Maturity Date, the Investment would continue to the Maturity Date in the name of the executor or administrator according to usual probate rules. For joint investors, in the event of the death of one investor the Investment would continue in the name of the surviving joint investor.

Where an investment is made on behalf of a self directed pension plan in the event of death of a policy holder/member prior to the Maturity Date, the Investment may be redeemed at its realisable value as determined by Wealth Options Limited and the Bank which may be more or less than the Capital Protected amount. The proceeds from such redemption would be paid to the life company.

WHAT ABOUT TAX?

The Investment is held in the form of a deposit account. Under current legislation any Variable Return will be subject to Deposit Interest Retention Tax of 33%, being the standard rate of tax (30%) plus 3%. In respect of the Deposit Investment, the interest will be subject to Deposit Interest Retention Tax of 30%. These deductions are applicable to investors who are Irish resident. These tax deductions will apply at the relevant Maturity Date and will be made at source by Ulster Bank. With respect to withdrawals, if applicable, tax will be deducted on payment of interest at the date of the return of the withdrawn amount. Tax liability and other matters referred to are as applicable under current legislation, which may change, and their applicability will depend on the investor's individual circumstances.

Certain non-residents, pension funds, charities, credit unions and companies may apply to receive returns gross without deduction of tax. Investors are responsible for providing any information or documentation necessary to confirm status.

All investors must accurately disclose all material facts. Investors are responsible for providing any information or documentation necessary to confirm non-residency, pension fund, charity, company etc status. Investors must satisfy themselves in relation to all revenue reporting and disclosure requirements and the implications of any such non-disclosure

To the extent that DIRT has been deducted there is no further liability to Irish income tax on the interest, but you may be subject to PRSI/Health levy.

References to "we", "our" or "us" shall refer to Wealth Options Limited.

2 Your Deposit Amount

Your Deposit Amount is placed in a fixed term deposit account held in your name with the Bank (the "Account"). No interest will be payable on your Deposit Amount before the Start Date.

3 Withdrawals

No withdrawals may be made from the Account before the end of the relevant Term without the Bank's consent; such consent would be granted entirely at the Bank's discretion. If you do withdraw money before the Maturity Date, you would receive only the net present value of your investment at that time, which may be significantly less than the amount you invested.

4 Capital Protection

On the relevant Principal Repayment Date the Bank will refund the relevant Capital Protected Amount irrespective of the performance of the Underlying Index. Your financial advisor will contact you before the Bond matures, advising you of the forthcoming Maturity Date and advising you of your options with respect to the maturing amount.

5 Investment Return Condition

5.1 The potential Variable Return payable on the Multi Strategy Investment part of the Investment will be determined on the Maturity Date of the Bond. If on the Maturity Date the Underlying Index has generated zero or negative growth, no payment will be due to you in respect of the Variable Return and you will receive back only the relevant Capital Protected Amount,

5.2 The Variable Return (if any) payable at the Maturity Date will be 100% of the increase (if any) of the Underlying Index from its closing level at the Start Date to its closing level at the Final Valuation Date subject to averaging. Averaging works by taking the closing level of the Underlying Index recorded on the Observation Dates and taking the average of these to provide the final level. The Variable Return (if any) will be added to the Capital Protected Amount on the Maturity Date.

5.3 The Capital Protected Amount is 100% protected by the Bank. The Variable Return (if any) is provided from the payout of a financial derivative contract entered into by the Bank with BNP Paribas (the "Counterparty") on the Start Date. Any Variable Return which may be payable is conditional on the fulfilment of the Counterparty's obligations to the Bank. If the Counterparty or the Bank were to default on the derivatives contract before its natural expiry the return would be calculated using best market practice and no further Variable Return would be earned on the Bond. In the event of the Counterparty being unable to fulfil its obligations to the Bank, or the Bank failing to pass on those returns, your returns may be limited to the return of your Capital Protected Amount at the Maturity Date.

5.4 Please note that averaging over the Term may have a negative impact on the Variable Return meaning that you may not receive the maximum benefit of any gains that may otherwise have been made by the Investment over the Term. However, averaging over the Term may also have the effect of protecting the Investment from the full extent of any losses that be suffered by the Underlying Index over the Term.

6 Past Performance

Warning: Past performance is not a reliable guide to future performance. Future investment returns are dependent on future market conditions.

7 Market Disruption

If at any time during the Term any of the events listed in sub-paragraphs (i) to (iv) occurs (each such event a "Market Disruption Event") in the form of:

- (i) disruption or suspension of, or limitation on, the operations of any of the parties or entities connected with the provision of services affecting the Bond for any reason whatsoever;
- (ii) any material modification of the Underlying Index and/or external pricing sources for any reason whatsoever;
- (iii) the calculation and/or publication of the Underlying Index or any external pricing sources is taken over by another person, or is replaced by a successor index, indices or source; or
- (iv) an error in the level of the Underlying Index or pricing source is discovered for any reason whatsoever,

then the Bank may adjust the values used in the calculation of the Variable Return as the Bank deems appropriate, having regard to the Market Disruption Event in question. The Variable Return (if any) may be lower as a result of the adjustment.

Further, following a Market Disruption Event, the Bank may substitute the Underlying Index with a similar index or indices.

8 Confidentiality

Wealth Options Limited and the Bank observe a strict duty of confidentiality about your financial affairs. They will not disclose details of your Account or your name and address to anyone else except for any confidentially appointed agents acting on their behalf, or in the four cases permitted by law. These are:

- Where they are legally compelled to do so;
- Where there is a duty to the public to disclose;
- Where their legitimate interests require disclosure; or
- Where disclosure is made at your request or with your consent.

In addition, the Bank may disclose your information to other members of The Royal Bank of Scotland group of companies of which it is a member.

9 Variation

These Terms and Conditions may be amended by us with the consent of the Bank. We will notify you of any changes and will always give you at least 30 days' notice.

10 Deposit Interest Retention Tax

The Investment is held in the form of a deposit account. Under current legislation any Variable Return will be subject to Deposit Interest Retention Tax of 33%, being the standard rate of tax (30%) plus 3%. In respect of the Deposit Investment, the interest will be subject to Deposit Interest Retention Tax of 30%. These deductions are applicable to investors who are Irish resident. These tax deductions will apply at the relevant Maturity Date and will be made at source by the Bank. With respect to withdrawals, if applicable, tax will be deducted on payment of interest at the date of the return of the withdrawn amount. Tax liability and other matters referred to are as applicable under current legislation, which may change, and their applicability will depend on the investor's individual circumstances.

Certain non-residents, pension funds, charities, credit unions and companies may apply to receive returns gross without deduction of tax. Investors are responsible for providing any information or documentation necessary to confirm the appropriate tax status.

All investors must accurately disclose all material facts. Investors are responsible for providing any information or documentation necessary to confirm non-residency, pension fund, charity, company etc status. Investors must satisfy themselves in relation to all revenue reporting and disclosure requirements and the implications of any such non-disclosure.

11 Disclaimer
